Building 910 Readiness for Operations	SPP 11400 FOM
Robert Benedetti, Associate General Manage Environmental Restoration Management	SM
EG&G Rocky Flats, Inc.	11700 EQS Ollowell X

The Environmental Restoration Division has reviewed the operational readiness of the Building 910 Evaporators. We have reviewed the results of the qualification testing and conclude that the distillate from all three evaporators meets the regulatory standards for raw water and that system is capable of processing ITS water as required by the Interim Measure/Interim Remedial Action (IM/IRA) Decision Document for Operable Unit No. 4.

Our review has also indicated that all pre-operational construction and associated component and system operational testing is complete and satisfactory, that all of the pre-operations start findings, transmitted to you via RFO letter, ERD:SRS:06771, dated June 11, 1993, have been satisfactorily dispositioned and that all operational procedures have been updated and approved and that the operating personnel are fully trained on current procedures. In addition, we understand that the EG&G Self-Assessment evaluated the operational status of Building 910 with respect to EM-20 guidelines, SAR requirements, as well as RFP policy and procedure.

Based on our review, the Environmental Restoration Division declares that the Building 910 Evaporators are ready to commence normal production operations and grants operational status. The Post Operational Items, included in the above referenced letter, must be closed, but on a schedule mutually agreed to by ERD and EG&G. The remaining items, the observations, can be acted on at EG&G's discretion.

Any questions concerning this declaration of operational readiness should be directed to Frazer Lockhart at extension 7846.

Richard J. Schassburger

Acting Director

Environmental Restoration Division

R. Benedetti ERD:SRS:08700
